### 2.2 The disk structure

- Winfree is installed in C:\Program Files\Winfree. This folder should never be used for meets. The only reason to access it is to add a new people.txt file.
- You should create your own folder for .fre data files. We recommend either **C:\Winfree** or **My Documents\Winfree**

### 2.3 Privileges

**You must have Administrative Privileges to install most software, including Winfree.**

## 3. Getting Help

Winfree: Windows Freestyle Scoring Program. For problems, assistance, or new ideas, call **585-582-5922** or email to **support@winfree.hfti.com**

Get the latest version at <https://winfree.hfti.com>

To get started, bring up the software and hit "Help-Contents" and pick "Getting Started". Also, hit F1 for help on any screen.

Warning: All software has bugs. No software should be used for long periods without backup of files. About once an hour, do a File > Backup Copy to another folder. Or, much better, to a USB drive in case the computer crashes.
