1 Running a ‘Standard Meet

1.1 Introduction

Dual Moguls differs significantly from other Freestyle and Freeski sports, in that there is a tree of competitors, who compete against each other in pairs with one skier moving forward in the tree.

The biggest issue for the draw is that it’s best if the skiers are ‘seeded’, so that good skiers don’t meet each other until late in the draw. If a skier is seeded wrong, poor skiers might move on or, worse, good skiers might knock each other out. Not only is this unfair, but it lowers the quality of the results.

The biggest issue for scoring is that a screw-up during scoring (like entering the wrong bib) might bring scoring to a halt for 10 or 15 minutes. For that reason, scoring shouldn’t be ‘in the loop’ during a competition. The Scoring Chairman gives out the draw, the officials run it by themselves, and scoring just enters scores when possible to print the results close to the end.

Skiers above a certain number are randomized – rather than running in exactly the seed of finished. Above a second point are also randomized. This is usually “FIS”. Ask someone.

Choices are:

- None: straight order of finish
- FIS: Random starting at 33 and 17.
- All: Everyone is random
- Custom: You set the one or two points.

Print out the Team Leader format.

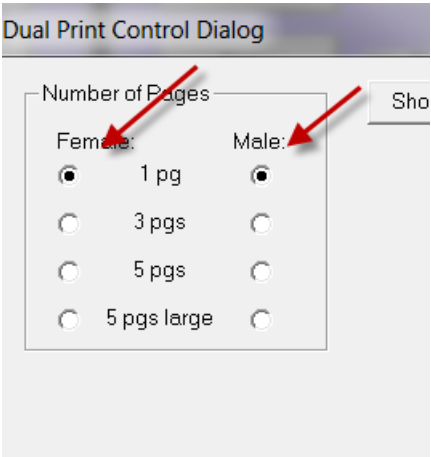

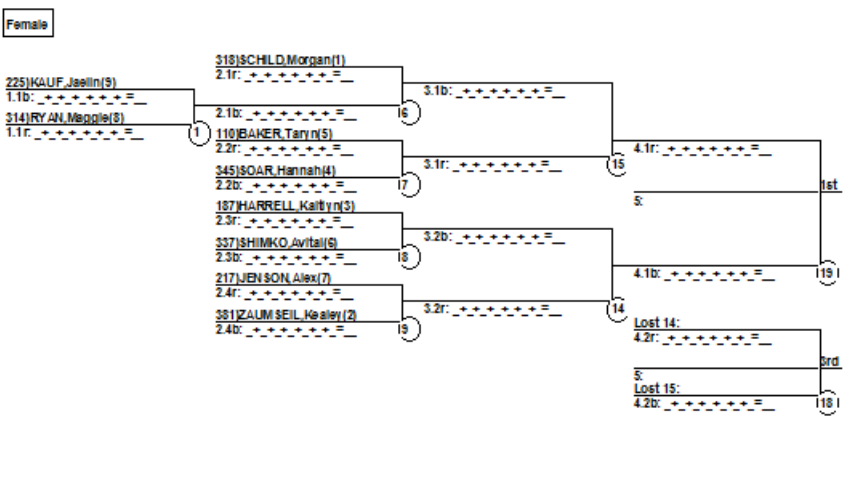

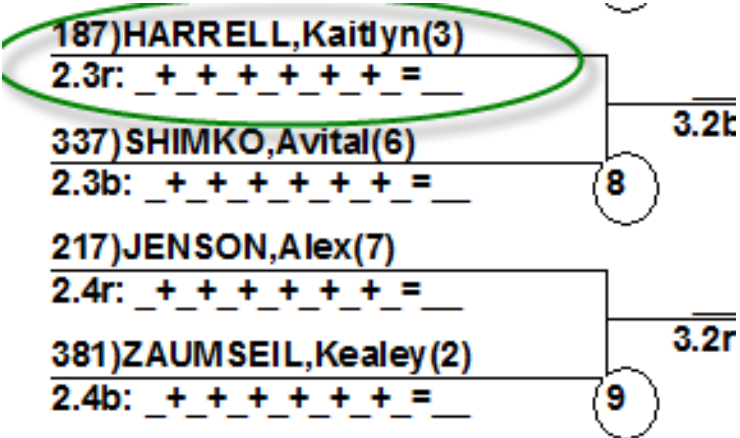

This is in Seed order.
Check it, and give it out at the Team Leader Meeting.
Ask for corrections. If there are any seed changes, see *Section 2.4 Adding or Changing Peoples' Seeds ('Fudging')*.

When you're happy with the seeds, preview the runorder

The screenshot shows a 'Preview on Screen' window with a 'Simple' / 'Advanced' toggle. On the left, a 'Format for Print' list includes: Prior day (1-Registration, 2-Team Leaders Meeting), Before (3-Runorder, 4-Practice, 5-Listing for officials), During (6a-Run checking (by runorder), 6b-Run checking (by bib), 7-Run posting), End (8a-Judges' check (by runorder), 8b-Judges' check (by bib)), and After (9-One run results, 10-Event results, 11-Results for finals). On the right, there are three dropdown menus: 'Event' (Moguls, Duals, Aerials, Slope Style, Half Pipe, Big Air, HalfPipe Finals, Slopestyle Finals, Duals How To, Registered, Everyone), 'Run' (1, 2, 3, 4, 5, 6), and 'Sex' (Female, Male, Both). Red arrows point to '3-Runorder' in the list and 'Duals How To' in the Event dropdown.

Enter the scores for one of the skiers

Then check that the other skier's scores are right.

Optionally, you might need to check off DNS or DNF at the bottom if that's the score. Do not use DSQ.

Repeat for all skiers and all rounds.

Print the event results when done.

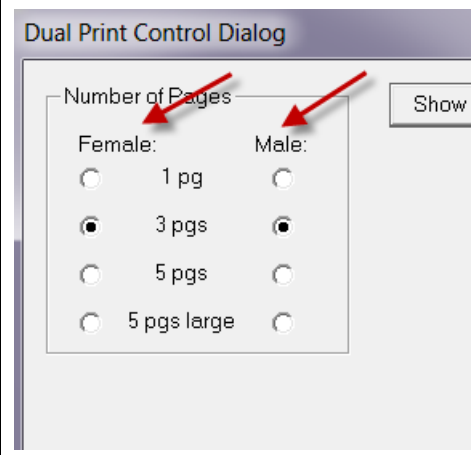

2 Non-Standard Procedures

2.1 Printing Draws on Several Pages

For large draws, it might be better to print on multiple sheets of paper. You might even want a very big listing to tack on a board.

In Preview or Print, after selecting Event and Duals, you'll get an additional screen to pick the number of pages for men and women. The choices are:

- 1 page: Put the entire draw on one page. The printing will be very small, but this is what the organizers like (fewer sheets to copy) and competitors like (fits in a pocket).
- 3 pages: Splits the semis off from the rounds leading to it. Often best for formal results or web sites.
- 5 pages: Best for extremely large draws.
- 5 pages large: Prints sideways with a large font, on pages that can be stapled together. Best for posting on a board near competitors.

<p>Select the number of pages.</p>

2.2 Seeding People from a Ranking List – Method 1 (Using Registration)

Sometimes, there is no mogul event for seeding, and the seeding comes off a list. Method 1 (Using Registration).

This takes almost no learning and is very easy for small draws. However, it is slower than Method 2 for large draws and is inflexible (you can't make a mistake).

In Registration, go into the entry for the top seeded skier, register them for the event, and hit the "Advanced" button.

The screenshot shows a software window titled "Enter one person" with a close button (X) in the top right corner. The window contains the following fields and controls:

- Name (Last,First): A dropdown menu showing "ANDRINGA, Jesse". To its right is a "Fill from database" button.
- ID #: A text box containing "6043640".
- Sex (M,F,?): A dropdown menu showing "M".
- Yr Born: A text box containing "1997".
- Location: A dropdown menu showing "Rocky".
- Events: A list of checkboxes with the following items:
 - Moguls
 - Duals
 - Aerials
 - Slope Style
 - Half Pipe
 - Big Air
 - HalfPipe Finals
 - Slopestyle Finals
 - Duals How To
- Bib (0 for none): A text box containing "105".
- Advanced: A button with a red arrow pointing to it from the right.
- Cost, Alternates, & Heats: A text box containing "ANDRINGA, Case".
- OK: A button at the bottom right.
- Cancel: A button at the bottom right.

In the Advanced menu, enter the number 1 for the Head/Seed.
Continue to do this for all skiers.

Go into Runorder for the Event, and step forward to the Type of Change.
Pick "Set/Change dual sees manually".

Step forward (Picking randomization as you go) until you get FEMALE screen like one at the right. Hit OK.
Do the same for MALES.
This completes the draw.

2.3 Seeding People from a Ranking List – Method 2 (Using Runorder)

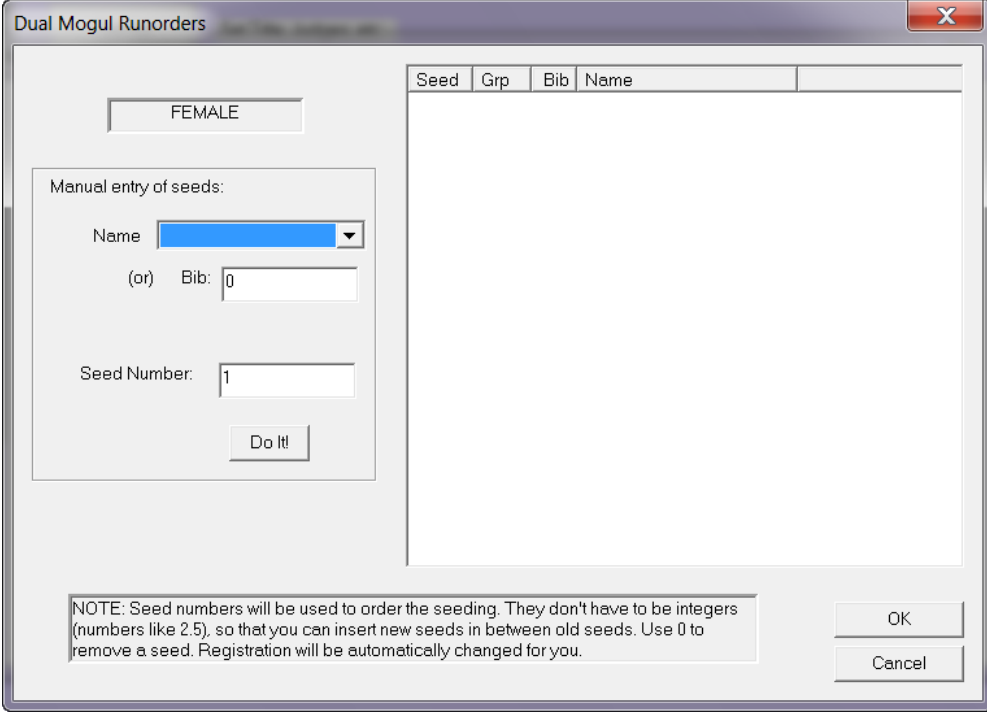

Sometimes, there is no mogul event for seeding, and the seeding comes off a list. Method 2 (Using Runorder).

This method will allow you to quickly set the runorder for even large events. It’s also the same method that is used for ‘fudging’ seeds.

Go into Runorder for the Event, and step forward to the Type of Change.
Pick “Set/Change dual sees manually”.

Step forward (Picking randomization as you go) until you get FEMALE screen like one at the right.

Pick the top seeded skier.

Either use name pulldown to pick a name, or use enter the bib. Either way is OK, and you'll see the other.

Hit "Do it" and that person will move to the right table. The Seed Number will advance to "2".

The screenshot shows the 'Dual Mogul Runorders' interface. At the top, there is a purple header bar. Below it, a button labeled 'FEMALE' is visible. To the right, a table lists the current skier: Seed 1.00, Grp F19, Bib 108, Name BAILEY, Madison. The 'Manual entry of seeds' section contains a 'Name' dropdown menu with 'BAILEY, Madison' selected, a '(or) Bib:' field with '108', and a 'Seed Number:' field with '2'. A 'Do It!' button is at the bottom. Red arrows point to the 'Name' dropdown, the 'Bib' field, and the 'Do It!' button.

Pick the 2nd seeded skier.

Pick the name or enter the bib. Then "Do it".

The screenshot shows the 'Dual Mogul Runorders' interface. The 'FEMALE' button is still present. The table now lists two skiers: Seed 1.00, Grp F19, Bib 108, Name BAILEY, Madison; and Seed 2.00, Grp F19, Bib 123, Name BOWERING, Lindsay. The 'Manual entry of seeds' section now has 'BOWERING, Lindsay' in the 'Name' dropdown, '123' in the '(or) Bib:' field, and '3' in the 'Seed Number:' field. The 'Do It!' button is at the bottom. Red arrows point to the 'Name' dropdown and the 'Do It!' button.

For correcting, see Section 2.4 Adding or Changing Peoples' Seeds ('Fudging').

The important thing to remember is that seeds don't have to be integers.

In this example, we forgot one skier, and added her as Seed 1.5.

The screenshot shows the 'Dual Mogul Runorders' window. At the top, there is a 'FEMALE' button. Below it is a 'Manual entry of seeds:' section with a 'Name' dropdown menu set to 'SACA,Chase', an '(or) Bib:' field with '317', and a 'Seed Number:' field with '1.5'. A 'Do It!' button is at the bottom of this section. To the right is a table of current seeds:

Seed	Grp	Bib	Name
1.00	F19	108	BAILEY, Madison
1.50	F15	317	SACA, Chase
2.00	F19	123	BOWERING, Lindsay

Red arrows point to the 'Seed Number' field and the 'Do It!' button.

Repeat for all Female Skiers. Then hit "OK" at the bottom.

Repeat for all Male Skiers.

The screenshot shows the 'Dual Mogul Runorders' window with a list of skiers. The 'Manual entry of seeds:' section has 'Name' set to a blue dropdown, '(or) Bib:' set to '0', and 'Seed Number:' set to '1'. The 'Do It!' button is present. The list of skiers is as follows:

Seed	Grp	Bib	Name
1.00	F19	318	SCHILD, Morgan
2.00	F19	381	ZAUMSEIL, Kealey
3.00	F19	187	HARRELL, Kaitlyn
4.00	F17	345	SOAR, Hannah
5.00	F19	110	BAKER, Taryn
6.00	F19	337	SHIMKO, Avital
7.00	Fsr	217	JENSON, Alex

12.00	F19	143	COYNE, Erin
13.00	F19	378	WRIGHT, Lexi
14.00	F19	125	BRISCOE, Abby
15.00	F19	341	SMITH, Hannah
16.00	F19	184	HALLAHAN, Phoebe
17.00	F17	144	COYNE, Katie
18.00	F19	153	DETELS, Megan
19.00	F15	114	BERGER, Natalie
20.00	F19	279	O'CONNELLE, Elizabeth
21.00	F17	272	MULDER, Jessica

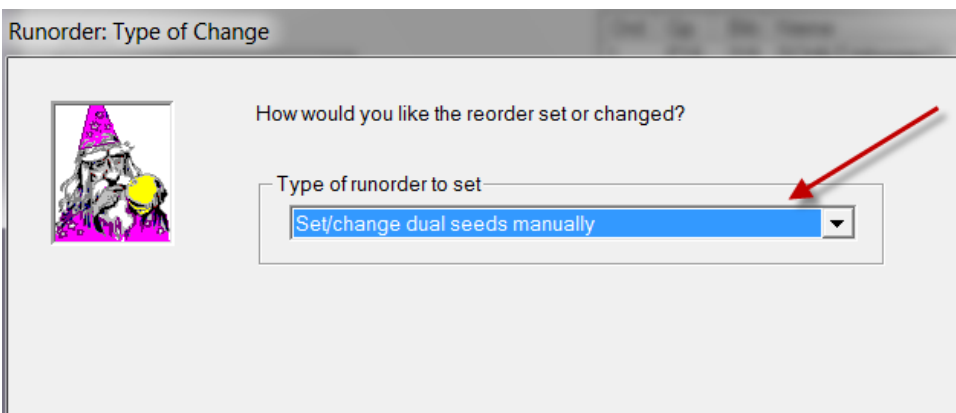

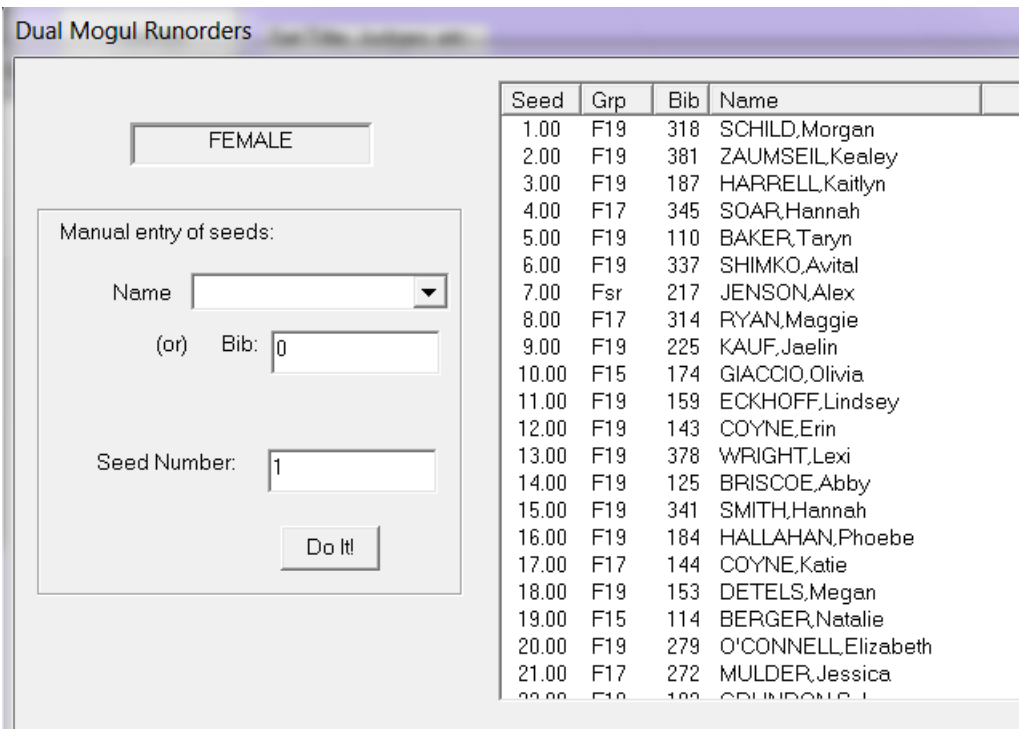

At the bottom, there is a note: 'NOTE: Seed numbers will be used to order the seeding. They don't have to be integers (numbers like 2.5), so that you can insert new seeds in between old seeds. Use 0 to remove a seed. Registration will be automatically changed for you.' Below the note are 'OK' and 'Cancel' buttons. A red arrow points to the 'OK' button.

2.4 Adding or Changing Peoples' Seeds ('Fudging')

It's pretty common that, after showing the seeding, the officials will a request like "Kauf was out injured and show have a much higher seeded – right above Soar."

This is a valid request, and helps the whole draw. It prevents good skiers from getting knocked out too early.

The important thing to remember is that seeds don't have to be integers.

Also, people can be changed.

In this example, we're going to take existing Seed 9 (Kauf), and insert her between Seed 3 (Harrell) and Seed 4 (Soar).

2.5 Adding or Changing People's Position in the Draw

Someone asks you to add a new person in a blank spot on the draw, or move someone from one spot in the tree to another.

No.

Quite simply, there is no way to do this. This is deliberate, since adding someone in a place where they are the incorrect seed is unfair to everyone else – and most particularly the people they'll compete with.

The only way to accomplish this is to re-draw and print new runorders.

2.6 What do the two Randomization-Points Mean?

It's common for organizers to say that low seed people are run 'as is' but high seed people are mixed. It's also common for them to say that high seed people shouldn't meet middle or low seed people in the first round.

The normal practice is that the lowest seed skiers ski against the top skiers. So, for example, in a draw of 64, number 64 is against 1, 63 against 2, etc. Then, in the next round, if the right people win, 32 is against 1, 31 against 2, etc. This continues until the end, when the 2 is against 1 (assuming the higher seeds beat the lower seeds all the way).

If the FIS randomization is used, skiers from 33 and up are randomized so that it doesn't matter which of those was really the best. Then skiers from 17 to 32 are randomized.

The choices are:

- If there is no randomization, the numbers 1000 are used as randomization points so that no skiers are ever above that point. This is the fairest, since the results of the moguls give better skiers an advantage..
- As mentioned, FIS uses 33 and 17. This is the most common.
- If everyone is randomized, the two points are 0, so that everyone is mixed up.
- The Custom choice allows any numbers the organizers want. For example, if they want to randomize only from 25 up, then the two numbers would be 25 and 1000.

Skiers above a certain number are randomized – rather than running in exactly the seed of finished. Above a second point are also randomized. This is usually "FIS". Ask someone.

Choices are:

- None: straight order of finish
- FIS: Random starting at 33 and 17.
- All: Everyone is random
- Custom: You set the one or two points.

Runoder: Dual Random

You can randomize skiers after certain places.
